Hands-Free & PTT
Fault-Detection
General Call
Group Calls
Vandal resistant
Robustness IK10
-40°C +70°C
Protected IP66

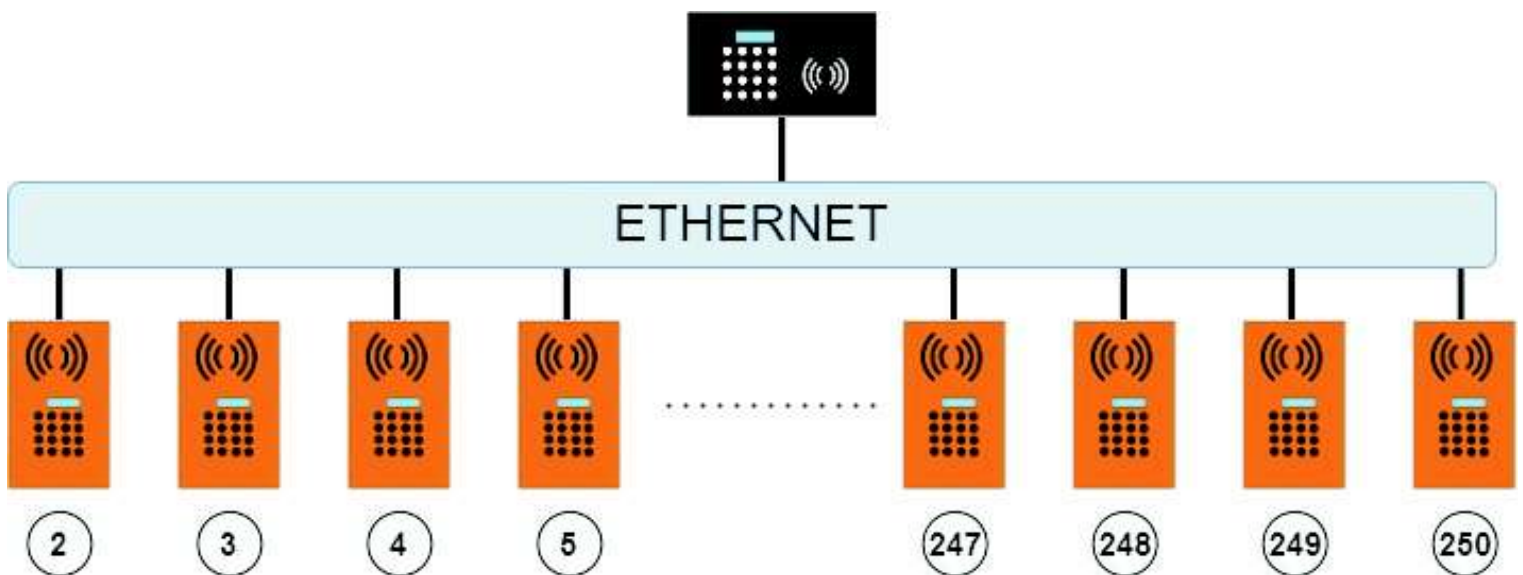

OCEAN-ip™ is a **Full-IP** professional industrial intercom system suitable to work on LAN. It works on **Peer-to-Peer protocol without Server**, but it is fully compatible with any VoIP Server with **SIP protocol**.

OCEAN-ip™ includes a wide range of different intercom stations, all are designed to obtain an **high quality conversation (HD-Voice)** also when working in very noisy areas, **where noise can reach and exceed the level of 90dB**.

To install your **OCEAN-ip™** intercom network it is enough to install two or more intercom stations on the same LAN. The system is working with **P2P protocol**, **there is no need of a Server**.

But, if you prefer, **OCEAN-ip™** intercom stations can also work on **SIP protocol**, so that it can be associated to the **VoIP Server DESQO™** or to any **third-party SIP Servers**.
